DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-2, drawn to AMOEL driving circuit configuration, classified in class 345, subclass 76.
 - II. Claim 3, drawn to driving sequences, classified in class 345, subclass 204.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as AMOEL driving circuit, which does not require driving sequences, as recited in subcombination II. See MPEP § 806.05(d).
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Joe Muncy on 6/9/2006 a provisional election was made without traverse to prosecute the invention of group I, claims 1-2. Affirmation of this election must be made by applicant in replying to this Office action. Claim 3 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joe Muncy on 6/9/2006.

The application has been amended as follows:

Cancel claim 3.

In claim 1, line 1, after circuit, delete "can drive" and add --for driving--.

In claim 1, line 5, after pixel, delete "consist of" and add --comprising--.

In claim 1, line 19, after line, delete "." and add--;--.

In claim 1, lines 6, 8, 11, 16, 19, and 23, first word, delete "A", and add --a--.

In claim 2, line 1, delete "For the" and add --The--.

In claim 2, line 2, delete "in Item 1", and add --of claim 1--

Allowable Subject Matter

6. Claims 1-2 are allowed.

7. The following is an examiner's statement of reasons for allowance: Claims 1-2 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claim 1, "A switching TFT having a drain connected to the source of the writing TFT and having a gate connected to the block control line; a resetting TFT having a drain

Art Unit: 2629

connected to the source of the switching TFT and having a source connected to a supply line and a gate connected to the front scan line, wherein the gate of resetting TFT of all pixels on the first scan line is connected to the Start-Erase Line; a driving TFT whose source connected to the supply line; its gate, the same as one end of storage capacitance is connected to the joint where the source of switching TFT and the drain of resetting TFT meet". The closest prior art, Kimura (6,909,242) discloses a driving circuit for an AMEL display panel with a similar circuit configuration, however, singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ricardo L. Osorio whose telephone number is 571-272-7676.
